

MARIA DEEPTHI A

Bengaluru, Karnataka, India

mariadeepthia@gmail.com | +91 9148973541 | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Computer Science undergraduate skilled in Python, Java, Machine Learning, SQL, and full-stack web development, with hands-on experience building 5+ AI/data-driven applications and completing Data Science internship applying machine learning to classification, regression, and fraud-detection problems. Seeking machine learning roles where I can apply strong fundamentals in data structures, RAG-based systems, and applied ML.

EDUCATION

B.E. Computer Science and Engineering | CGPA: 8.9/10

2023-2027

APS College of Engineering, Bengaluru

Relevant Coursework: Operating Systems, Computer Networks, Database Management Systems, Data Structures & Algorithms, Design & Analysis of Algorithms, Software Engineering & Project Management, Machine Learning

SKILLS

Technical Skills: Python, Java, SQL, JavaScript, HTML, CSS, Machine Learning, Data Structures & Algorithms, RAG, Prompt Engineering, FastAPI, REST APIs, Data Visualization

Frameworks & Databases: FastAPI, Flask, Pandas, NumPy, Scikit-learn, MongoDB, SQLite, ChromaDB

Tools & Technologies: Git, GitHub Actions, Docker, REST APIs, VS Code

Soft Skills: Communication, Team collaboration, Problem-solving, Leadership

PROJECTS

LLM-Powered Code Review Bot (Jun 2026) | [GitHub Repo](#)

- Built an AI-powered code review platform using FastAPI, Gemini, ChromaDB, SQLite, and Docker that automatically identifies security vulnerabilities, logic bugs, performance issues, and code smells across 4 review categories while generating structured review reports and quality scores.
- Engineered a repository-aware code review platform by implementing RAG with ChromaDB, developing 6+ REST APIs, enabling concurrent request handling with async FastAPI, and containerizing deployment using Docker.

Lumora- Mental Health Tracker Web App (Sep-Nov 2025)

- Crafted a full-stack mood-tracking web application using Flask, HTML, CSS, JavaScript, and MongoDB featuring user authentication, mood logging, journaling, personalized insights, analytics dashboard, and dark/light mode support.
- Designed 5 core modules (Authentication, Mood Tracking, Journaling, Insights, Profile Management) with mood trend visualization and persistent user data storage.

PROFESSIONAL EXPERIENCE

Data Science Intern, CodSoft (Feb-Mar 2026) | [GitHub Repo](#)

- Developed 4 machine learning projects using Python and Scikit-learn, including classification, regression, and fraud-detection systems.
- Achieved 92% fraud-class recall on Credit Card Fraud Detection, and R^2 score of 0.90 on Sales Prediction and 81% accuracy on Titanic Survival Prediction, through feature engineering, preprocessing, and systematic model evaluation.

ADDITIONAL INFORMATION

- Awards: Department Topper (Rank 1), Computer Science & Engineering, APS College of Engineering (2025-26)
- Certifications: Infosys Springboard- Data Science, Power BI, Business Intelligence, Big Data, Cloud Technologies, Agile Software Development.
- Languages: English (Proficient), Kannada (Native)
- Social Work: NSS Volunteer (2023-present), AICUF Club (2021-2023)
- Served as Main Coordinator for both Hogathon (50+ participants) at Aakruti Fest and Reverse Coding (10+ participants) at Megahertz Fest, leading volunteer teams and managing event operations.
